

XCool Series from XDS[™]

Premium Building Film

Enhance the beauty of your Home or Office

Add style, distinction, and value to your property. Choose from the variety of shades available.

Protect your Interiors. Lower Electricity Bills.

The UV radiation, heat and strong sunlight can fade your furnishings, fabrics, carpets and sofas. High level of heat means extra energy load on your airconditioning system. Control UV radiation, heat and excessive light giving your interiors a longer life. Blocks heat before it enters your home noticeably reducing electricity bills.

Enjoy the Sunshine in Comfort

Reflects upto 79% of the sun's heat.

While we all enjoy sunshine, we do not enjoy the accompanying heat. Now you can enjoy the aesthetic pleasures of sun drenched enclaves without the uncomfortable side effects.

XDS Glass Protection System

The most unique security film in the world

Guard against break ins, burglary and vandalism

Limitation of today's unenhanced glass is that the glass breaks. Glass is everywhere, and is the weakest link to the safety of any building.

Primary function of XDS Glass Protection System is to strengthen glass, then keep the glass intact in its frame, if broken. The likelihood of injury to person and property is greater in the course of normal glass breakage than XDS treated glass.

It is a proven fact that the application of the XDS Glass Protection System to existing glass can enhance the strength of the glass by upto 400% hence reducing damage and injury upto 80%

Your Shield Against The Forces Of Nature

Storms, hails, hurricanes, earthquakes, tsunamis... name it you're protected. It is proven that even there is sufficient force to break glass, the XDS Glass Protection System, (GPS) holds upto 95% of the fragments together preventing injury from shattered glass while also providing protection from fire and water.

Here's precisely how XDS-GPS work

There are two parts to the system. One – A super tough mylar polyester with a scratch resisting coating. Two - A specially formulated and proprietary high temperature acrylic adhesive, which when applied to the glass, actually infiltrates the glass pores, gets absorbed and hardens to strengthen the glass itself. The result! The same glass now becomes stronger by upto 400%. It actually repels objects hurled at it! **That includes bricks and flying debris.**

► Accidental Shattering ► Thefts ► Vandalism

Enhance your vehicle with

XDS Automotive Solutions

Lifetime Warranty*

100% Genuine USA made Product.
